

Technical Note TN-700

Current Standard Radio and Programming Software used in production

13th March 2002

Applicability

This Technical Note applies to all **standard** T2000's.

1. Information

Details

It has been noted that there has not been a Technical Note detailing changes to radio and programming software for some time.

This Technical Note will provide information on the current **Production** software for the **Standard** T2000 radios. It will not provide information for non-standard radios or customer specific radios. It doesn't, for example, refer to any TCI software.

Radio	Radio Software	Programming Software
T201X	v2.05	v1.40
T2020	v5.54	v2.54
T2030	v3.28	v1.58
T2035	v3.47	v1.58
T2040	v5.63	v2.75

The above table is accurate as of the 13th of March 2002. Updates will be published as new software is put into production.

2. Compliance Issues

There are no compliance issues that need to be addressed for this Technical Note.

2. Issuing authority

Name and position of issuing officer	Paul Anderson Mobiles Customer Support Engineer
