## Technical Note TN-625

### **T2035 L.E.D. Display Messages**

21 July 2000

---

#### **Applicability**

This Technical Note only applies to the T2035 product range

---

## **1. Introduction.**

#### Information

The T2035 has a number of 3 character display messages that are often hard to decipher. This Technical Note has been developed to make it easier for dealers, technicians and sales staff to better understand the radio and it's functions.

The T2035 displays the various messages not only with the 3 digit LED display, but with the FCN, DESP, CLEAR and QUEUE LED's available.
