

Technical Note TN-553

Modifications to the T2000 IF PCB.

24 February 1998

Applicability

Only applies to the T2000 radios currently being produced.

Information:

The following modifications have been made to the T2000 IF board (220-01384-01).

Customers requested a reduction in IF vibration and a reduction in IF PCB height to prevent contact with the bottom cover. The new PCB also eases the manufacture of the IF PCB.

Modifications :

- 1) A length of Tesamoll Tape has been applied over the “pip” on the IF PCB (directly above C850).
- 2) The PCB height has been reduced.

NOTE: No changes have been made to the electrical performance of the IF board.

C.S.O's:

Please inform dealers and customers at your discretion.
