

Technical Note TN-554

T3000 400-520MHz Radio Modifications

24 February 1998

Applicability

Only applies to the T3000 400-520MHz radios currently being produced.

Information:

The following modifications have been made to the T3000 400-520MHz I.S board to bring the board in line with standard RF boards of the same frequency band (400-520Mhz). The purpose behind this move is to use up stock of IS boards that are no longer eligible to be used in IS applications.

Changes made are :

- 1) R245 has been added (10 Ω)
- 2) A zero Ω resistor has replaced the fuse.

The first serial number to use these PCB's is **159187**.

NOTE : These radios are not to be used in IS applications

C.S.O's:

Please inform dealers and customers at your discretion.
