

Technical Note TN-620

1. Tait Orca Conventional Programming Application V1.2.0 (TOPCPA)
2. Tait Orca Download and Configuration Application V1.2.0 (TOPDLCA)

1.1 TOPCPA v1.2.0

1.1.1 Applicability

This Technical Note applies to the release of the new Windows based Tait Orca Conventional Programming Application v1.2.0

1.1.2 Release Date and Distribution

Date of release for this software is the 1/6/00. A copy of the software will be burnt onto CD and sent to all CSOs for distribution. This CD will be available on Baan in the near future. It is also planned to provide this software via Taitworld.

1.2 New features available V1.2.0

No new features have been implemented into the Conventional Programming Application.

1.3 Minimum Hardware Requirements

	Minimum	Suggested
RAM	8 Mb	16 Mb
Free Hard Drive Space	25 Mb	25 Mb
CPU	486	Pentium 100
Monitor	640 x 480 x 256	800 x 600 x 256

TOPCPA v1.2.0 has been designed and tested to run on all current 32-bit operating systems ie. Windows 95, 98, 2000 and NT4.

1.4 Manual

The IPN for the Conventional Programming Application user manual is 439-51110-00

1.5 Known issues remaining with V1.2.0

- There may be difficulties installing TOPCPA onto Windows 95A. If this happens then run the following application:

/Tait Electronics Ltd/Utilities/DAO Install/Disk1/setup.exe

- Generating a file with the channels not in sequential order will cause the radio to fail. To resolve this open the file, open the channels page then re-save the file or program the

radio. This step of re-opening the channels page places the channels into a sequential order.

1.6 Compatibility

The following conventional radio databases are supported with this version of Conventional Programming Application: 2.00, 2.01, 2.03, 2.04, and 2.05

2.1 TOPDLCA v1.2.0

2.1.1 Applicability

This Technical Note applies to the release of the new Windows based Tait Orca Download and Configuration Application v1.2.0

2.1.2 Release Date and Distribution

Date of release for this software is the 1/6/00. Copies of the software will be burnt onto CD and sent to all CSOs for distribution. This CD will be available on Baan in the near future. It is also planned to provide this software via Taitworld.

2.2 New features available V1.2.0

No new features have been implemented into the Download and Configuration Application.

2.3 Minimum Hardware Requirements

	Minimum	Suggested
RAM	8 Mb	16 Mb
Free Hard Drive Space	25 Mb	25 Mb
CPU	486	Pentium 100
Monitor	640 x 480 x 256	800 x 600 x 256

TOPDLCA v1.2.0 is designed and tested to run on all current 32-bit operating systems ie. Windows 95, 98, 2000 and NT4.

2.4 Manual

The IPN for the Download and Configuration Application user manual is 439-53010-00
