

Tait Orca Calibration Software V1.02

21 August 1998

Applicability : Tait Orca Elan/Excel Conventional hand portables

Explanation : V1.02 Tait Orca Calibration software is capable of calibrating both UHF and VHF conventional portables only.

There is one limitation when calibrating VHF portables. That is the 'PA Bias' can not be calibrated. However, the only time that this will be requiring calibration is when the PA has been serviced, otherwise it will not require any recalibration after leaving the factory.

This release is not capable of calibrating trunked radio's

Customer Service Organisation: Please ensure that all internal sales/service staff are informed and also dealers at your discretion
