

Technical Note TN-679

New speaker pin spacer T5000.

23rd July 2001

Applicability

This Technical Note applies to all TOP 5000 series.

1. Information.

In formation on New speaker spacers is as follows:

- On ECO 501262
- Spacer is used to prevent the speaker pins from compressing to far and getting stuck thus causing RX audio faults. The Spacers are there to take the brunt of the force if the radio is dropped on its face. These spacers are totally retrofit-able.

Changes take effect from the following S/N: 14119163
J/N: 155160.

2. Issuing authority

Name and position Of issuing officer	Stephen Pavett Customer Support Engineer
